

SunFed Ranch is committed to raising all cattle to the highest of standards. Whether you're purchasing organic or natural beef, you can trust that all SunFed Ranch cattle meet stringent standards.

No hormones. No antibiotics. No corn. Simple as that.

The result of this commitment is responsibly raised beef of the highest-quality, unmatched flavor and many health benefits. It's no coincidence that when we let our cows live like they're meant to, the taste is richer and the meat is healthier.

When it comes to beef, simple is better.

All SunFed Ranch beef is:

- **Grass Fed and Grass Finished**
- **Never Fed Corn or Grain**
- **No Antibiotics**
- **No Hormones**
- **Humanely Treated**
- **Free Ranging**
- **Family Raised**
- **Angus-Based Genetics**

SunFed Ranch organic grass fed cattle are USDA certified to have never been administered growth enhancing hormones or antibiotics and to have grazed only on our certified organic ranches managed without the use of fertilizers or pesticides.

Our organic grass fed cattle and ranches are individually audited to ensure that our beef is 100% certified from our pastures to your kitchen table.

SunFed cattle are raised on pastures, eating grass their entire lives, never in feedlots and never fed any corn or grain.
