

Creekstone Farms' mission is to produce and deliver the world's finest Black Angus Beef. The Creekstone Farms Premium beef program is unique to the beef industry because it combines superior Black Angus genetics, exceptional cattle management practices, carefully controlled high-quality feeding and state-of-the-art processing of only genetically verified Black Angus cattle. Everything is done from focusing on genetics to closely monitoring processing and production, is all in the name of **quality**.

From the cattle they procure all the way through the state of the art processing, Creekstone is committed to producing the highest quality beef in America through the Creekstone Farms Premium Black Angus Beef programs!

### **CREEKSTONE FARMS PREMIUM BLACK ANGUS BEEF**

#### **What makes Creekstone Farms Premium Black Angus Beef the best?**

- USDA Certification - Requires more stringent supervision and testing than non-certified programs
- Proprietary Black Angus genetics, some of the best in the industry, serve as the benchmark of quality for our program
- The humane treatment of our cattle helps to produce superior quality beef
- Cattle sourced from Creekstone Farms Black Angus genetics and verifiable Black Angus genetics documented through our rancher partners
- Corn-based feed ration produces well-marbled, tender beef
- State of the Art processing takes place in our own plant devoted solely to the production of Creekstone Farms Premium Black Angus Beef.
- EU Certified
